

**1**  
**Contents:** telescopic pole w/ 2 rods, bottom crossbeam w/ wire attached to plastic piece, & stand base.

**2** Turn base over; slide rounded end of the plastic piece attached by wire to the crossbeam, into slot on underside of base if unattached.

**3** Turn base right side up, remove blue cap, fill with ballast, and replace blue cap. (sand, water, ect.)

**4**  
Insert telescopic pole into open hole near rear of base.

**5**  
Pull lower cross beam to adjust length as needed for width of banner.

**6**  
Attach the banner from 2 hooks at top first.

**7**  
Attach bottom of banner to 2 remaining hooks on crossbeam that is connected to base.

**8**  
Twist knob on pole counter-clockwise to unlock telescoping pole & adjust upward until banner becomes taut, secure by turning clockwise to lock in position.
